EXPERIENCE

Web Developer
Disruption, Los Angeles, CA

August 2017 – Sept 2017

- Developed website with Wix and used Canva to increase the web presence of the company
- Used A/B testing to determine better marketing strategies to increase web presence of the company on social media sites including Facebook using ClickFunnels and also tested different features
- Applied agile SCRUM development on the projects which included weekly meetings with the CEO
- Completed the designated tasks while keeping track of deadlines using web application Asana
- Cross-browser testing for Quality Assurance

Web Developer and Designer Intern
Commune Communication, Long Beach, CA

Feb 2017 – June 2017

- Built homepage of a professional website for an NGO: Friends of LA River
- Managed the content, layout and working of the website and worked with Adobe Photoshop to convert Photoshop (PSD) to HTML/CSS/JavaScript web development
- Worked and communicated with the teams to develop and maintain dynamic web pages using current web technologies with the help of Asana and Zoho used to keep track of the work
- Tested front-end code in multiple browsers to ensure cross browser compatibility
- Developed and designed variety of WordPress sites from inception to completion. Projects include website UX, SEO, Google Analytics, Testing, Revising, Updating, and Hosting
- Created websites for assisted living communities in WordPress and changed the layout by making basic PHP edits in the theme template
- Changed the design of a website for Council Woman: Lena Gonzalez using CSS3 and WordPress

ACADEMIC PROJECTS

- **Web Development (Proprietary):** Designed a professional website for a real-life client using Mash Up Approach. This site decreased the purchasing time and eased the method of purchasing large quantities of various goods from multiple warehouses. The project was recognized as the first outsourced project in the college by a company.
- **Website Design:** Improvised the design of real-life client by adding plugins for e-commerce website.
- **Software Application - Graphical Password Authentication:** Designed a software to enhance security of important files and folders in the computer. Increased the efficiency by keeping the graphical structure of the authentication simplified. Reduced the shoulder surfing problem and use of static images.
